

neomento is a spin-off project of the German Center for Neurodegenerative Diseases (DZNE). We develop innovative, research-backed virtual reality (VR) based solutions for psychotherapy. Our team in **Berlin** (partly remote work possible) is currently looking for a:

Psychologist/Psychiatrist (f/m/d)

Your tasks:

- Development and management of (clinical) studies
- Analysis of quantitative data (biophysiological data, therapy parameters, questionnaires etc.)
- Communication with clinical practitioners and institutions
- Development of stimuli and concepts for therapeutic VR environments
- Development of biofeedback loops for virtual reality applications

Your ideal profile:

- Master's degree or similar in Psychology, Psychiatry or related fields
- Experience with quantitative research (stimulus development, data acquisition, statistical analysis...)
- Creative approach towards applying your skills to psychological and clinical research as well as the development of modern therapy software and technology
- Strong interest in psychological research and Clinical Psychology
- Strong organizational skills and an open mind towards learning new things
- Fluent in written and spoken German and English
- Proficient knowledge of SPSS, R or similar software for statistical analysis

Why join us?

- Shape the development of innovative therapy software that is already used by clinics
- Employment within a prestigious research institution
- Your work will directly benefit the well-being of patients
- Work with cutting-edge VR devices as well as modern biosensors etc.
- Work in an interdisciplinary and dynamic team

Starting date: appr. 01.04.2019

Contract length: appr. 14 months, 30-35 hours per week
(permanent contract possible depending on further funding)

If you are interested, please send your portfolio and application and CV to career@neomento.de.
